PR FARID RA has been conceived in Italy, when owning certain bloodlines was a must and a satisfaction for those who had the chance to do such a great outcross.

PR FARID RA is son of an cross of horses with strong masculine type.

As per what is written in the low maternal line, despite

the fact that have been attempts to overturn the basic type, using different breeding cross with **MORAFIC** as it was normal during that historical period.

He is a phenotype stallion with an ancient pedigree: it is enough to read about its second generation to reach the beginning of the gold times in the history of horses bred in

the United States of America. For this reason its use has to be considered as a reproducer.

*His mother is **RAAFALA** bred at the Gleannloch Farm in the United States.*

***RAAFALA** was a strong brood mare with large diameters quite similar to the type of her blood line as her pedigree says. A real Kubaylan at all.*

*You can clearly read how **SAMEH**, all the Rodanian line and all the Maisa line have forged the phenotype.*

*The father of **RAAFALA** is the beautiful **AMAAL**, a full brother of **SHAIKEI BADI**; the mother of **RAAFALA** is **BINT ROMANAA**, a full sister of **DALIA**.*

*How can you forget his son **IMPERIAL IMDAL**?*

*When she was ready for her last son, for **RAAFALA** was chosen the frozen semen of **ANAZA EL FARID**, the new star that was driving crazy America.*

*This stallion was very masculine, strong and athletic: a **DAHMAN SHAHWAN** the ancient way.*

***ANAZA EL FARID** is a name that nowadays you find with an unexpected frequency in the pedigrees of the modern show horses; the incredible power of transmitting this type during several generations has changed the scenario of the showings all over the world and this lead to change from the grey color to the brilliant shades of dark*

 (in mother and father line)

*reddish-brown.
 This SE stallion, until now, was living in a big estate in
 Tuscany only used to be ride and amuse the family of the
 last owners and Breeders and produced only these gorgeous
 jewels .*

*Paradoxically you will not find his blood lines in a lot of
 the Straight Egyptians pedigrees, but we are sure that his
 special bloodline will become very famous, once again, to
 cross especially all **Ansata** and **Nagel** bloodline's mares.
 Inshallah.*
